

**Governance in the Age of Information, Digitalisation
and Artificial Intelligence**

Table of Contents

Introduction	13
Chapter One. Changes and Disputes as a Permanent Feature in the History of Governance	23
1.1. Interactive Links between Politics and Its Surroundings	23
1.2. Relations between Governance and Political Power	25
1.3. Governance as an Activity to Meet Changing Challenges	26
1.4. Increased Importance of Functional and Relational Mechanisms in Governance	26
1.5. Governance as Imagined Reality	28
Chapter Two. The Perspective of Qualitative Changes in Governance at the Beginning of the 2020s	32
2.1. A Long List of Strategic Reasons for Inevitable Changes in Governance	32
2.2. The Expansion of the Power of Communication, Digital Civilisation and Artificial Intelligence as a Fundamental Factor of Changes in Governance	33
2.3. Introduction to a Strategic Forecast of Changes in Governance	34
Chapter Three. Transformation of the Society Model as a Factor of Change in the Field of Governance	42
3.1. The State of Society as the Chief Factor in Governance	42
3.2. Information Network Society as a Qualitatively New Environment of Governance	44
3.3. The Increasing Power of Communication and the Development of Digital Technologies as a Factor of Further Transformations in the Social Environment of Governance	47
3.4. The Expansion of Digital Civilisation as a Factor of Change in the Model of Power	50

3.5. Polish Society in the Process of Transformations Related to New Communication and Digital Technologies	53
Chapter Four. The Internet, Social Media and the Digital Civilisation – a Conglomerate of Freedom and Organised Surveillance	59
4.1. The Internet as a Sphere of Great Expectations, Achievements and Dangers	59
4.2. The Political Dimension of the Expansion of Social Media and the Digital Civilisation	62
4.3. The Political Power of Internet Communication Tool and Algorithm Admins	64
4.4. Privacy as a Great Loser in the Context of the Emergence of Digital Civilisation	66
4.5. The Pathology of Marketing the Data of Social Media Users ..	69
4.6. Difficulties in Reconciling Freedom and Privacy with Online Competition	71
4.7. Polish Standards with Regard to the Boundaries of Freedom in Online Communication	74
Chapter Five. Data Collected in Cyberspace as a Political Resource	80
5.1. The Unique Value of Digital Data	80
5.2. Data Collected in Cyberspace as the Object of Organised Abuse	81
5.3. The Battle on Discretionary Access to the Global Pool of Electronic Information	83
5.4. Growing Systemic Surveillance of Electronic Communication Carried out by State Agencies	84
5.5. New Dependencies Related to Electronic Data Resources	87
5.6. The Political Dimension of Behavioural Microtargeting with the Use of Internet Data	89
5.7. Threat to the Security of Personal Data Collected in Cyberspace as a Challenge to Governance	94
5.8. A New Dimension of Discrepancies between Freedom and Security in the Area of Internet Data, Artificial Intelligence and Dissemination of Electronic Surveillance Technologies	98
Chapter Six. The Digital Dimension of Sovereignty. Global Competition in Modern Communication and Digital Technologies	108
6.1. Artificial Intelligence as the Foundation of the Emerging Technological and Information World Order	108
6.2. Cyberspace as an Area of Growing Competition and Confrontation between States	115

6.3. The Emergence of Digital Civilisation as the Target of Financial Investment and Research and Implementation Works	132
6.4. The Risk of Growing Inequality and Confrontation Resulting from the Emerging Cybernetic World Order	133
6.5. Poland and the Global Competition in Modern Communication and Digital Technologies	136
Chapter Seven. Digital Civilisation as an Area of Political Game and Manipulation	141
7.1. The Internet as an Instrument of Optimising Politics, Political Communication and Governance	141
7.2. The Internet as a Tool of Industrialising Political Disinformation and Manipulation	144
7.3. General Election as a Period of Growing Risks of Abuse of New Technologies in Politics	147
7.4. Combat against Digital Pathologies as an Object of Systemic Measures and an Area of New Manipulations	154
7.5. Relations between Politics and Digital Technologies in Poland	173
Chapter Eight. The Expansion of Information Technologies, Digitalisation and Automation as a Fundamental Regulatory Challenge for Governance	176
8.1. The Need to Focus Scientific and Technological Efforts on the Pursuit of Fundamental Values and Human Interests	176
8.2. Ethical and Legal Problems Concerning Digital Technologies	177
8.3. Attempts to Work out the Principles for Developing Artificial Intelligence Together	178
8.4. Actions to Define the Rules and Standards for the Development of Smart Technologies	179
8.5. Strategy of Artificial Intelligence Development in Poland	186
Chapter Nine. Digital Civilisation as a Challenge for Governance in the Area of Security	192
9.1. New Digital Opportunities and Threats in the Area of Offensive, Defensive and Protective Measures	192
9.2. Growing Dependence of States and People on the Undisturbed Operation of Digital Tools	195
9.3. Evolution of the Battlefield and Conflicts in the Context of the Development of Digital Technologies	197

9.4. State Hackers Interfering with Public Awareness and Hacking into Electronic Devices and Computer Software as a Security Threat	202
9.5. Cybercrime as a Challenge for Governance	209
9.6. Development of Digital Technologies as a Factor of Change in Security Systems	212
9.7. Problems of Digital Civilisation in Security Strategies and Practice in Poland	215
Chapter Ten. Digital Civilisation as a Tool of Politics, Governance and Administration in Poland	229
10.1. The Place of Digital Technologies among the Tools of Sustainable and Responsible Development	229
10.2. Progress of Computerisation: a Prerequisite for the Implementation of Digital Solutions for Public Policies	231
10.3. E-government: a Key Element of the Digital State	239
10.4. E-governance: a Mechanism for Exploiting the Potential of Digital Technology in the Political Sphere	254
Chapter Eleven. What Next? Strategic Dilemmas with Regard to the Future of Governance and Politics in the Conditions of Further Expansion of Digital Civilisation	265
11.1. Awareness of the Inevitability of Further Qualitative Changes in Social Relations Due to New Technologies	265
